# NEPTUNE - Nowcasting and impact-based Predictions of Inundations in Mediterranean catchments

Pierre Javelle (Inrae), Lorenzo Alfieri (Cima)

# Background

Aide humanitaire  
et Protection civile

- Heavy rainfall and their impacts are difficult to manage, especially in **mountain, mediterranean** and **transborder** areas.
- To support decision making, there is a need for **impact-based** forecasting systems, working at **high space-time resolutions**.

Breil/Roya, France

Ventimiglia, Italy

Impacts on the Roya catchment after the storm Alex (October 2020)

# The NEPTUNE project (2022-2024)

Aide humanitaire  
et Protection civile

- Precipitation predictions
- End-users evaluation and implementation

- Hydrological modelling and forecasting
- Impact-based predictions

Kick off meeting : 5-6 April 2022 on the transborder Roya catchment

# NEPTUNE developed tools

Aide humanitaire  
et Protection civile

- Precipitation predictions
- Hydrological modelling and forecasting
- Impact-based predictions
- End-users evaluation and implementation
